

EMBEDDING CASE STUDY

Automotive PUR moulding

Threaded studs for fastening polyurethane mouldings to the vehicle. Plain pins to guide the assembly fitment.

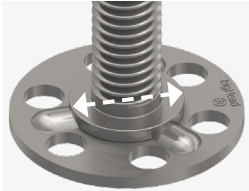

Specialist features – ensures PUR moulding supplier meets different OEM assembly fit requirements, even with small-series production volumes

WHY BIGHEAD?

Examples of specialisations we can we offer

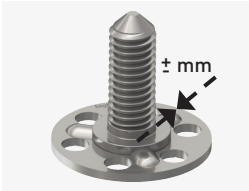

Stud end-forms
Features that assist automated handling or assembly fitment operations

Wide shoulder
For maximising clearance hole sizes or surface available for moulding shut-off

Alternative finishes
To meet specific corrosion resistance or thread friction coefficient requirements

Specific tolerances
We are happy to discuss specific tolerances or dimensional requirements for your applications
